

Richland Operations Office

Safety and Health Accomplishments

- The S&H program has been strengthened in the following areas to support ISMS implementation
 - Increased worker involvement in job planning, hazards analysis, safety inspections and injury investigations
 - Improved resolution of safety issues by Employee Safety Councils
 - Workshops to improve workers' knowledge of injury investigation techniques, hazard identification, and controls
 - Application of automated Job Hazard Analysis and other tools to identify and control potential hazards

Accomplishments (cont.)

- Improved radiological work planning and performance resulted in fewer skin/contamination occurrences for the fourth consecutive year
- An Industrial Hygiene Monitoring Plan was developed and implemented for the Waste Management Laboratory
